REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: It is agreed with the applicants's argument provided in the response on January 26, 2007. The present specification considered as a whole discloses the use of the compound of formula (1) to solve problem in the photothermographic material producing silver image such as using compound of formula (1) as the development accelerator rather than the use thereof as the color developing agent taught in the applied prior art of record. Therefore, the use of the compound of formula (1) as accelerator for a photothermographic producing silver image would not have been found obvious to the worker of ordinary skill in the art, and claims are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
